

# Shortage of Attendance

Dean Academic has the list of student enrolled in academic year 2014 but it doesn't have list of student who are having shortage of attendance for semester. So for these purpose it have requested your Department to forward the list of student who have attendance below 10 in 20 classes. So being your responsibility as branch coordinator you have write a simple Ruby on Rails app that could display all those name of student who have shortage of attendance.

## Feature:-

1. Users have to input at least 20 names with their Reg No, Name, Branch and No of class attended.
2. Users also have to display the list of student who have attended less than 10 classes.
3. User have to implement authentication using third parties (Facebook, Google etc) or also can use Gem like Devise, Warden or any of your choice.  
[Note:- no need of creating admin panel]
4. Add print button with print functioning in display page.
5. Put up your entire code on GitHub and send me the GitHub URL of this app.

## Extra Feature (Bonus Points):-

1. Display should have good UI and be in table format.
2. Host app in cloud service like Heroku or ShellyCloud.
3. Make it responsive.
4. Use PostgreSQL or NoSQL(MongoDB) database.
5. Try adding some JavaScript effect to make more attractive.

## Rules:-

1. You can use any Gem, Library or tools there is not limit.
2. Users are allowed to use any template, Bootstrap or Zurb foundation.
3. Each and every student code are evaluated on basis of performance, design and accessibility. So try to make User friendly and Readable.
